Watering

Planted areas should be watered when necessary to ensure continuous healthy growth. Monitor all areas for water logging, ponding of water or malfunction of irrigation system.

Weed Removal

Remove weed growth that occurs throughout the garden and turf areas. Weeds larger than 300mm high should be removed by hand.

Pruning/Thinning and Dividing

Generally pruning work should be implemented to maintain dense foliage development and encourage suitable growth habits.

Trees

Monitor tree growth and carry out formative pruning in late winter or early spring. Remove any branches with weak attachment and any crossing or rubbing branches.

Mass Planting Areas

Monitor growth and remove spent flower heads where necessary. Carry out minor pruning works in late winter to early spring to encourage dense habitat. Cut back native grasses in late winter to early spring to 150mm minimum height.

Mulch

Maintain mulched surfaces in a clean and tidy condition. Reinstate mulch to match existing 75mm depths generally in mass planting areas.

Turf

Generally monitor health, pest and disease, and vigour monthly. Fertilize and top dress turf in mid spring. Carry out mowing at two (2) weekly intervals during summer and at monthly to six (6) week intervals during winter.

*Terms and Conditions Apply. Value of Bonus is dependent on size of lot purchased. The package excludes driveway, boundary fencing, retaining walls, gravel, letterboxes or turf to nature strip and any paving. It does not include the clean-up and the removal of all rubbish.
